

## Solve Downtime Quickly with Watlow's THINBAND® Universal Stock Heaters

THINBAND®, Watlow's patented reinvention of the mica band heater is the solution to reduce costly equipment downtime. Watlow's new Universal Stock Program for THINBAND heaters allows same day shipment for a wide range of diameters, including metric-sized barrels.

Watlow stocks THINBAND barrel heaters in diameters from three to nine inches in ¼ inch increments, and widths in 1½ inch, two inch and three inch. Watlow can combine these sizes from stock to create a two-piece band heater to fit any diameter between three and 18 inches. Both 240 and 480 volt combinations are available. This versatility should satisfy almost any requirement whether in millimeter or inch size barrels.

Quick Clamp latching device option makes it possible to install Watlow THINBANDs quickly and easily, without tools! Simply open the THINBAND heater to the full diameter of the barrel, place in position and latch the Quick Clamp. Other barrel heaters do not need to be removed to install the THINBAND.

Watlow has the solution to costly machine downtime, the THINBAND Universal Stocking Program. Call today for same day shipment.

Watlow...innovative answers to practical problems.
