Camp description:

Summer camp? Sort of . . . but better. Our programs aren't ordinary, and neither are the 1,000+ students that attend. They build robots, conduct chemical analysis, explore entrepreneurship, and inspect ecosystems. Coming from across the country and around the world, students learn engineering, digital photography, metal casting, and more—all in an adventurous, fun, and hands-on way.

Camp #1: Coding for Internet of Things (IoT)

Camp #2: Electrical & Computer Engineering

Camp #3: Engineering 101

Camp #4: Mechanical Engineering: Design the Future
