*Application 26*

*Shelf Timer* ........................................ 1

*Ordering Information* ................................. 10
Application 26 is a shelf timer, controlling one temperature zone, and up to six concurrent timers.

**Overview of Key Steps**

1. Install the MINICHEF 2000.
2. Wire the controller.
3. Configure the controller.
4. Program the menus.
5. Set the controller security.
6. Set the Real-time Clock.

For instructions on Steps 1, 2, 3, 4, 5 and 6, see the Hardware & Software Set-up Guide.

7. Design, manufacture and apply faceplate overlay for end-users. (For a suggested design to suit this application, see this section. For overlay dimensions and guidelines, see the Hardware & Software Set-up Guide.)
8. Operate the controller. (See this application guide.)
Key Functions in Configuration Mode

Display five-digit, seven-segment numeric LED display.

Indicator lights
(1 for each key, 2 for heat channels).

Edit key (A) Access the next level of parameters or values.

Enter key (B) Enter the value and return to previous level.

Home key (D) Move to Operation Mode with a two-second key press.

Key Functions in Operation Mode

Heat Indicator Light
Lit when heat output is on.

Timer Keys
Activate, acknowledge, shut off and cancel corresponding timers.

Timer Key Indicator Lights
Lit...Timer running
Rapid flash...Done

Summary of Input/Output Functions

Input 1 Temperature → Output 1 Heat
Input 2 not used → Output 2 not used
Event Input 1 not used → Event Output 1 not used
Event Input 2 not used → Event Output 2 not used

Output 5 Audible Alarm

Note: For details, see wiring instructions in the Hardware & Software Setup Guide.
### Configuration Mode Quick Reference

These are the functions, parameters and values included in the Configuration Mode for this application. You must select Application 26 to access them. For directions, see the Hardware & Software Setup Guide. The Appendix of that guide includes an explanation of all parameters and values.

Step 7 Design a Faceplate Overlay

To complete the installation, you must apply a graphic membrane to the front panel of the controller. The following artwork will help you design and create a membrane for this application. For more dimensions and guidelines, see the Hardware & Software Setup Guide.

Suggested End-user Overlay:

![Image of a membrane overlay with time settings and buttons]

This Prototyping and Training Membrane Overlay will help you with the configuration and programming steps. To order it, see the Ordering Information at the back of this guide.
Step 8 Operate the Controller

</tbody>
</table>

Startup

Apply power to the controller.

[**idle**] will appear on the display.

If the Real-time Clock Display option is installed and [**Setup / Time**] is programmed, the time of day will appear on the display.

Preheat

If the [**ready**] parameter under the Setup function in the Configuration Mode is set to [**yes**], the controller will detect temperatures and preheat to operating temperature (above relative set point minus the ready band) as required.

The set point temperature will continue to be maintained while the controller is on.

Run a Timer

1. With [**idle**] or time of day on the display, press the key for the timer that you want to run. If a timer is currently running you may activate another timer by pressing the key for that timer. Any combination of timers may be running simultaneously. When the controller is running multiple timers the timer with shortest countdown time will be displayed.

2. When a timer has completed [**End**] will appear on the display, the timer key indicator light will flash rapidly, and an alarm will sound until the timer key is pressed to acknowledge and shut off that timer.

3. To run another timer repeat steps 1 and 2.

Note: The controller will not respond if you select an invalid timer (one for which Time 1 is set to 0).

Cancel a Timer

Canceling a timer stops that timer only. The controller maintains set point temperature and the other running timers will continue to run.

• Press the active timer key for 2 seconds.

Restart Timer

Press the key(s) for the timer(s) you want to run at any time.
Temperature Alarms

The controller will alert you to temperature alarm conditions if they occur. If an alarm occurs, take action as determined by your supervisor. See the Appendix in the Hardware & Software Setup Guide for a Troubleshooting Chart and a summary of temperature alarms.

Errors

The controller will alert you to errors if they occur. Errors are critical problems that shut down the unit. If an error occurs, an error message will appear on the display. You should switch off the power and call for service.

See the Appendix in the Hardware & Software Setup Guide for a Troubleshooting Chart and a summary of errors.
**Specifications (1032)**

**Control Mode**
- Single and dual heat channels, PID or on/off.\(^1\)
- Microprocessor-based, programmable, reverse-acting control outputs.
- User-selectable embedded application software defines operation of display, keys, inputs, outputs, timing action.
- One-step auto-tuning, WatHelp diagnostics, WatCurve temperature compensation.

**Agency**
  - EN 50081-1: Emissions
  - EN 50082-1: Immunity
  - EN 60730-1 and EN 60730-2-9: Safety
- NSF Listed, Criteria 2.\(^5\)
- AGA: UL tested to AGA standard Z21.23, UL File #E43684.
- UL and C-UL recognized, UL 197, 873, 991 and CSA standard C22.2-24, File # E43684.

**Operator Interface**
- Membrane overlay, contamination and water resistant, (supplied by customer).
- LED display, 5-digit, 0.56 in high, red.
- Displays times, temperatures, user prompts and diagnostic codes.
- User-selectable time and temperature display formats.
- Temperature display formats—˚F or ˚C.
- Time display formats—H:MM:SS, HH:MM, or MMM:SS.
- 8 discrete indicator LEDs, red.
- 6 tactile feedback keys.
- Menu-driven operation and manual modes available.
- WatHelp diagnostics.
- Real-time clock option displays time of day.

**Accuracy**
- Calibration accuracy and sensor conformity:\(^2\) ± 2.0°F for Type J thermocouple and RTD, ± 0.35% of span for Type K and E thermocouples, ±1 LSD, 77°F ± 5°F ambient and rated line voltage of ±10%.
- Accuracy span: 1000°F (540°C) minimum.
- Temperature stability: ± 0.15°F/˚F (0.15°C/˚C) change in ambient typical.

**Sensors/Inputs**
- Contact inputs, TTL compatible with internal pull-up resistor, two available.
- Thermocouple,\(^3\) software selectable Type J, K or E, 32 to 1200°F. (Dual-channel applications require at least one ungrounded thermocouple).
- RTD,\(^2\) 2- or 3-wire, platinum, 100, 500, 1000Ω, at 0°C, software selectable DIN or JIS curves, 0 to 1200°F (3-wire will function as 2-wire).
- Input A/D resolution: 15 bit.

**Output Options**
- Solid-state relay, 0.4A, with or without contact suppression.
- Switched dc signal, 4.5V to 5.25V, 30mA maximum output, minimum load resistance > 150Ω, non-isolated.

**Audible Output Options**
- Switched dc signal, 4.5V to 5.25V, 30mA maximum output, minimum load resistance > 150Ω, non-isolated.
- Internal audible alarm, 75dB at 10 cm.

**Connectors**
- Sensor Input Terminal Strip\(^4\): RIACON, 6-position, quick-connect.
- Power Supply & Input/Output Terminal\(^4\): AMP, 15-position, quick-connect.

**Power/Line Voltage**
- 20.4 to 26.4V~ (ac), 47 to 63Hz.
- 15VA maximum.
- For CE applications, input power must be limited to 15W external to the control.
- Program retention upon power failure via non-volatile memory.
- Battery/real-time clock option: 6-year lithium battery, provides power backup upon power failure, operation resumption after power recovery, ability to display time of day.

**Operating Environment**
- 32 to 176°F (0 to 80°C), 0 to 90% RH, non-condensing.

**Storage Temperature**
- -40 to 176°F (-40 to 80°C).

**Mechanical**
- Case: polycarbonate Lexan with adjustable mounting collar (vertical or horizontal orientation), designed for mounting on 16-, 18-, 20- and 22-gauge panels.
- Internal panel mounting requires a specified panel cutout and four #6-32 studs or equivalent.
- Overall width x height x depth: horizontal - 4.13 in x 3.25 in x 2.00 in; vertical - 3.25 in x 4.13 in x 2.00 in (Assumes mating connectors are attached. Does not include wire bundle space requirements.).
- Vibration: 2g, 10 to 150Hz, applied in any one of three axes.
- Weight: 6.50oz maximum.

**Program Storage**
- All non-embedded user and factory programs are stored in non-volatile memory. Can be changed by reprogramming.

**Sample/Update Rates**
- 1 input: 4Hz.
- 2 inputs: 4Hz.
- PID: 1Hz.
- Control outputs: 100Hz.
- Display: 10Hz.

---

1. The MiniChef 2000 controller is to be used in systems with an external high temperature limiting device.
2. Thermocouple lead resistance of 200Ω causes < 1°C error. RTD, 22 gauge wire will not contribute more than 0.086°F error/ft.
3. Dual channel applications require either two thermocouple sensors or two identical RTD sensor types.
4. For mating connector information, see Ordering Information Accessory section.
5. Certified for thermometer accuracy (oven and hot food holding applications from 32°F to 60°F) when used with RTD or type J thermocouple probes.
### Ordering Information

**MiniChef™ 2000**
Cooking controller with numerous food equipment application software sets, single and dual channel on/off or PID temperature regulation, timer and machine-function control, microprocessor-based, programmable, auto-tuning, Watcurve, WatHelp diagnostics, 24V~ (ac) power input, agency approved, flush mounted (membrane faceplate supplied by customer).

#### Inputs
1. Dual thermocouple, Type J, K or E
2. Dual RTD, platinum, 1000Ω, curve selectable
3. Dual RTD, platinum, 500Ω, curve selectable
4. Dual RTD, platinum, 1000Ω, curve selectable

**Note:** All models include two event inputs, switched dc logic signal, non-isolated.

#### Output Number 1
1. Switched dc, 5V nominal, 30mA, non-isolated
2. Solid-state relay, Form A, 0.4A, without RC suppression
3. Solid-state relay, Form A, 0.4A, with RC suppression

#### Output Number 2
1. Switched dc, 5V nominal, 30mA, non-isolated
2. Solid-state relay, Form A, 0.4A, without RC suppression
3. Solid-state relay, Form A, 0.4A, with RC suppression

#### Event Outputs 1 and 2
1. 2 event outputs, switched dc, 5V nominal, 30mA, non-isolated

#### Battery and Real-time Clock
0. None
1. Includes battery and real-time clock

#### Audible Alarm
0. Alarm signal available at connector, switched dc, 5V nominal, 30mA, non-isolated
1. Internal alarm included

#### Software
AA = Standard Food Equipment Application Software Set
XX = Custom Set-up parameters or Made-To-Order custom software. Consult your local Watlow Sales Engineer. Code number assigned by factory.

Watlow Controls

Watlow Controls is a division of Watlow Electric Mfg. Co., St. Louis, Missouri, a manufacturer of industrial electric heating products since 1922. Watlow begins with a full set of specifications and completes an industrial product that is manufactured totally in-house, in the U.S.A. Watlow products include electric heaters, sensors, controls and switching devices. The Winona operation has been designing solid state electronic control devices since 1962, and has earned the reputation as an excellent supplier to original equipment manufacturers. These OEMs depend upon Watlow Controls to provide compatibly engineered controls that they can incorporate into their products with confidence. Watlow Controls resides in a 100,000-square-foot marketing, engineering and manufacturing facility in Winona, Minnesota.

Technical Assistance

If you encounter a problem with your Watlow controller, refer to the Troubleshooting Chart in this guide. Also review all of your configuration information for each step of the setup to verify that your selections are consistent with your applications.

If the problem persists after checking all the steps, you can get technical assistance by calling Watlow Controls at (507) 454-5300, between 7 a.m. and 5 p.m. CST, and asking for an applications engineer. When you call have the following information on hand: the controller’s part number, date code, serial number, software revision number, and application number. Much of this information is available on the controller case. All of this information is also available via the MiniChef 2000 main display by accessing the WatHelp Diagnostics Function under [diag] in the Configuration Mode.

We Value Your Feedback

Your comments and suggestions on this manual are welcome. Please send them to, Technical Writer, Watlow Controls, 1241 Bundy Blvd., P.O. Box 5580, Winona, MN 55987-5580 or call (507) 454-5300 or fax (507) 452-4507.

Contact

- Phone: (507) 454-5300.
- Fax: (507) 452-4507.
- For technical support, ask for an Applications Engineer.
- To place an order, ask for Customer Service.
- To discuss a custom option, ask for the MiniChef 2000 Product Manager.

Warranty

The MiniChef 2000 is warranted to be free of defects in material and workmanship for 36 months after delivery to the first purchaser for use, providing that the unit has not been misapplied. Since Watlow has no control over its use, or misuse, we cannot guarantee against failure. Watlow's obligations hereunder, at Watlow's option, are limited to replacement or refund of purchase price of a unit which upon examination proves to be defective within the warranty period. This warranty does not apply to damage resulting from transportation, alteration, misuse, or abuse.

Returns

- Call or fax Customer Service for a Return Material Authorization (RMA) number before returning a control.
- Put the RMA number on the shipping label, and also on a description of the problem.
- 20% of net price restocking charge applies to all standard units returned to stock.

Note: All documentation of the MiniChef 2000 is subject to change without notice.
Notes
