Summer Youth Program

Summer camp? Sort of . . . but better. Our programs aren't ordinary, and neither are the 1,000+ students that attend. They build robots, conduct chemical analysis, explore entrepreneurship, and inspect ecosystems.

Coming from across the country and around the world, students learn engineering, digital photography, metal casting, and more—all in an adventurous, fun, and hands-on way. click here

Camp #1: Coding for Internet of Things (IoT)

Camp #2: Electrical & Computer Engineering

Camp #3: Engineering 101

Camp #4: Mechanical Engineering: Design the Future

Location: Michigan Tech	Ages: 9-11th grades	Date(s): Weekly camps June - August

Summer Engineering Exploration Camp

SEE Camp's mission is to provide students with an introduction to a variety of engineering fields. Students will leave camp with a better understanding of real-world applications of engineering as well as more knowledge of their own personal interests. The camp also gives students the chance to experience life at the University of Michigan. click here

Location: U. of Michigan	Ages: 10-12th grades	Date(s): July 9th – 15th
